

#### BLACK SOLDIER FLY DEFATTED MEAL

#### Technical data:

Produced from the larvae of the Black Soldier Fly, grown in a fully controlled environment using an optimised and safe feedstock mixture sourced from clean, traceable streams of pre-consumer okara, rice husk, vegetables and grains - thermomechanically extracted from pasteurised larvae dried at low temperature, the defatted meal is a source of protein, essential amino acids, minerals and energy. The product is well adapted to animal feeds.
