The Black Soldier Fly Company

Take it easy, we do the work for you.

The perfect partner for the UK & EU pet food and animal feed industries.

The UK and EU are experiencing exponential growth as the insect farming industry gains market share in the pet food, animal feed, aquafeed and food for wildlife sectors. Insect Agrifeed is the perfect global trading partner to work with in order to meet this demand. With our efficient supply chains and unique position in the marketplace, we open up the global market for Black Soldier Fly products and simplify overseas trading. We can guarantee to meet your needs at every opportunity by securing the best quality products available at competitive prices.

“

End-to-End service, developed over years of experience, to simplify the process of buying BSF products.

–Anthony Crosbie CEO

”

Insects are already an important part of the food chain and with advances in technology, harmonised with nature, their use is moving into new sectors, globally.

Fish meal and soya are being replaced with Black Soldier Fly products for wildlife, aquatic and pet consumption. Research has shown that BSF ingredients are healthier and far more planet friendly to produce than many traditional sources of protein.

We work with producers to supply BSF whole dried larvae, defatted meal, oil and insect frass, in a balanced way that is good for the planet, people and the animals we feed, as part of the circular economy model of sustainable management.
